PROFESSIONAL SUMMARY

AWS Certified Final Year B.Tech CSE student with hands-on experience in cloud networking, infrastructure automation, CI/CD pipelines, and DevSecOps. Skilled in Python, Kubernetes, Docker, and GitHub Actions. Built multi-cloud governance and compliance solutions on AWS. Aspiring Cloud and DevOps Engineer.

EXPERIENCE

Enacton Technologies Pvt. Ltd.-DevOps Intern

July 2026 – Present

- Gaining hands-on exposure to production infrastructure management across DigitalOcean, Hetzner, Contabo, AWS, and GCP, supporting affiliate and SaaS platforms with Nginx, Docker, Cloudflare, and Ansible

SKILLS

Networking: TCP/IP, OSI Model, Subnetting & CIDR, DNS, NAT, Security Groups, NACLs

Cloud: AWS (EC2, S3, RDS, Lambda, IAM, CloudWatch, VPC, CloudFormation)

Tools: Docker, GitHub Actions, Git, Kubernetes

Programming: Python, Bash, SQL

Databases: PostgreSQL, MongoDB

OS: Linux, Windows

EDUCATION

B.Tech – Computer Science & Engineering

Parul University, Vadodara | Sept 2023 – Present

CGPA: 8.56/10

Relevant Coursework: Computer Networks, Network Security, Cloud Computing, DSA, OS, DBMS

PROJECTS

Multi-Cloud Governance Platform

Jan 2026 – March 2026 | [Live Demo](#) | [GitHub](#)

Tech Stack: Python, FastAPI, Terraform, Docker, GitHub Actions, AWS, JWT, PostgreSQL

- Designed declarative Terraform IaC blueprints for cloud resource provisioning with automated dry-runs (terraform plan), and built a state-machine deployment control plane with full event auditing and rollback support
- Built a policy-as-code YAML engine to automate configuration approvals and compliance validation, cutting manual validation effort by ~70-80%
- Set up a GitHub Actions CI/CD pipeline for automated testing, linting, and containerized deployment (Docker), achieving zero-downtime releases

CloudSentinel – CSPM & DevSecOps Platform

April 2026 – May 2026 | [Live Demo](#) | [GitHub](#)

Tech Stack: Python, Flask, AWS Boto3, Checkov, Trivy, Docker, Kubernetes, JWT, PostgreSQL, Chart.js

- Engineered a Shift-Left DevSecOps pipeline integrating Checkov and Trivy for automated pre-deployment IaC static analysis and container vulnerability scanning, catching 80% of critical issues before deployment
- Built Terraform drift comparator evaluating expected network state against live-deployed cloud assets, reducing reconciliation time by 90% through real-time diff timelines.
- Migrated the Docker-based container stack to a local Kubernetes (Kind) cluster, configuring PersistentVolumeClaims (PVC), ConfigMaps and RBAC policies for secure, inside-the-cluster scanning.

CERTIFICATIONS

- AWS Certified Cloud Practitioner – Amazon Web Services | [View Badge](#)
- AWS Academy Cloud Foundations – Amazon Web Services | [View Badge](#)

ACHIEVEMENTS & AWARDS

- Selected in Top 45 teams out of 720+ teams at Vadodara Hackathon 6.0 (2025)
